

## **Weekly report**

**2012-7-2    ~~    2012-7-8**

In this week, one of the patents applications was discussed with the layer. There were some points should be revised. Some description also should be improved.

I have completed the first version of survey of volume visualization, and have discussed some points with Dr. Luo. He pointed out that we could add some contents about non-photorealistic rendering.

I finished the first two sections of the textbook revision. I will finish this task as soon as possible.
